- Omni-Directional Scanning and Decoding
- Solid-State Electronics Means No Moving Parts for Added Reliability
- Small Form Factor Makes Mounting and Integration Easy

Aggressive 2D Fixed Mount Imager

JADAK's FM-7 is designed for applications that require aggressive 1D/2D barcode scanning and may also require image processing functions.

At the heart of the FM-7 is the latest in barcode imaging technology, regardless of whether the barcode is on paper, a cell phone, or metal.

Utilizing the only area sensor designed specifically for reading barcodes, the FM-7 has longer product life cycles than devices using off the shelf area sensors. The FM-7 not only excels at reading barcodes, the dual-functionality sensor provides both dedicated black & white mode (ideal for barcode) and color mode (ideal for image analysis). The FM-7 includes a bright, integrated and intuitive aimer.

Applications:

- Manufacturing
- Clinical Analyzers
- Kiosks
