

L: 5.64"; W: 3.16"; H: 2.29"

## Features & Benefits:

- Multi-Functional for a Wide Range of Applications
- Easy Setup with USB or RS-232 Protocol Via Detachable Interface Cables
- Customizable and Integration Services Available

## Presentation Phone Reader

JADAK's KM-204 is a fixed mount barcode scanner designed for integration into kiosks and other devices where 1D and/or 2D barcodes are presented by the user.

Integrating the KM-204 into your device is easy. The KM-204 requires no external decoders or illumination. It communicates with standard RS-232 or USB (Communication Port of Keyboard Emulation) interfaces via detachable interface cables.

The KM-204 uses safe LED illumination to scan barcodes, eliminating the need for laser warning labels on equipment. And with no moving parts, the KM-204 provides years of worry-free performance.

The KM-204 is easy to use. It has an integrated scanning cone that provides users with a physical indication of where to scan, as well as true omni-directional barcode scanning.

## Applications:

- Coupon Scanning
- Price Checking
- Ticket Scanning
- Mobile Phone Display Reading (e-tickets & e-coupons)
- Signature and Image Capture
- Optical Character Recognition (OCR)

# KM-204

Performance	
Light Source	Red LED Illumination, Green LED Aiming Line
Image Capture	8-Bit Grayscale Image, 752 x 480
Mechanical/Electrical	
Dimensions (L x W x H)	5.64" x 3.16" x 2.29"
Input/Output	5VCD Trigger Input
Power Supply	5VDC Input
Communication	
Communications	RS-232 up to 115.2K baud / USB (Keyboard or COMM Port)
Environmental	
Operating Temperature	0° to 50°C (43° F to 122° F)
Humidity	95% relative humidity, noncondensing, at 50°C
Agency	Designed to meet FCC Class B and CE Specifications
Supported Symbologies	
Linear	Code 39, Code 128, UPC, Interleaved 2 of 5, Stacked Linear: PDF417, RSS Codes
2D	DataMatrix, QR Code, Aztec Code, Maxicode
