**Features & Benefits:**

- Built around proven ThingMagic Nano module
- Highly integrated UHF RFID reader with SAM 4S architecture & 1 GB processor
- Optional board-mounted antenna with read range up to 2 meters
- Standard options for USB or Serial RS232 interface, and custom configurations for SPI, I2C or RS485
- Pre-loaded Autonomous Workflows simplify integration
- RAIN Communication Interface supports RAIN RFID technology standards
- Support for EPCglobal Gen 2V2 Protocol (ISO 18000-63)

**Highlights:**

- Speed and ease of integration due to all-in-one embedded solution that includes reader module, antenna (optional), and processor to RFID-enable applications.
- Among the first products in the market to support a new developer friendly interface between applications and RAIN RFID readers – RAIN Communication Interface (RCI)
- Comes pre-loaded with a selection of Autonomous Workflows for the most common use cases. Allows users to operate without RFID expertise, SDKs and integration tools.
- The simplicity of the keyboard emulation mode allows data transfer across multiple platforms, without the need for custom application interface.
- Design is highly configurable and can be customized for unique applications. Contact JADAK to discuss how EL6e can be tailored to fit your specific application.

**Ideally suited scenarios include:**

- Bulk-reading a small set of items, like instruments in a surgical kit
- Reading a specific item but looking for longer range than HF RFID can provide
- Final item verification for inventory or returns processing
- Updating tag information with item usage information
- RFID tag commissioning

**Application Areas:**

- Medical Equipment for Healthcare and Pharmaceutical Industries
- Kit assembly and returns processing stations
- Access gates in parking garages, ski lift gates, and other applications

## Power

### Power Consumption (Full RF Output Power)

- USB Powered: 5VDC +/- 10% at 3.5 W;
- External Power: 4.5-10 VDC at 4.9 W; 10-26 VDC at 4.4 W

### Power Consumption (Not Transmitting)

- USB Powered: 5VDC +/- 10% at 1.0 W;
- External Power: 4.5-10 VDC at 2.4 W; 10-26 VDC at 1.9 W

**ABOUT JADAK:**

JADAK, a business unit of Novanta, is a market leader in machine vision, RFID, barcode, printing, and color and light measurement products and services for original equipment manufacturers. The business designs and manufactures embedded detection and analysis solutions that help customers solve unique inspection, tracking, scanning and documenting challenges. JADAK is based in Syracuse, New York, with sales and technical locations across the globe. For more information, visit [www.jadaktech.com](http://www.jadaktech.com).

ThingMagic is JADAK’s RFID line of products.

Novanta is a trusted technology partner to OEMs in the medical and advanced industrial technology markets, with deep proprietary expertise in photonics, vision and precision motion technologies. For more information, visit [www.novanta.com](http://www.novanta.com).
